- Up to 32 GSM channels
- Up to 256 cards
- VoIP and PRI interface in one box
- GSM and 3G cards in one box
- 2N[®] SIM Star support

2N[®] StarGate

Target group:

Companies of any size

- Call centres where calls are made to GSM networks
- Terminating companies

Customer needs:

- Cost saving
- Back-up solution in case of PSTN line failure

2N[®] StarGate

Benefits to the customer:

- Least Cost Routing (up to 8 SIM cards per channel)
- SMS sending/receiving
- Call Back (SMS & Voice)
- Free minutes count

2N[®] StarGate

Arguments for:

- Least Cost Routing
- Routing according to free minutes
- Up to 8 SIMs per channel

Extra services:

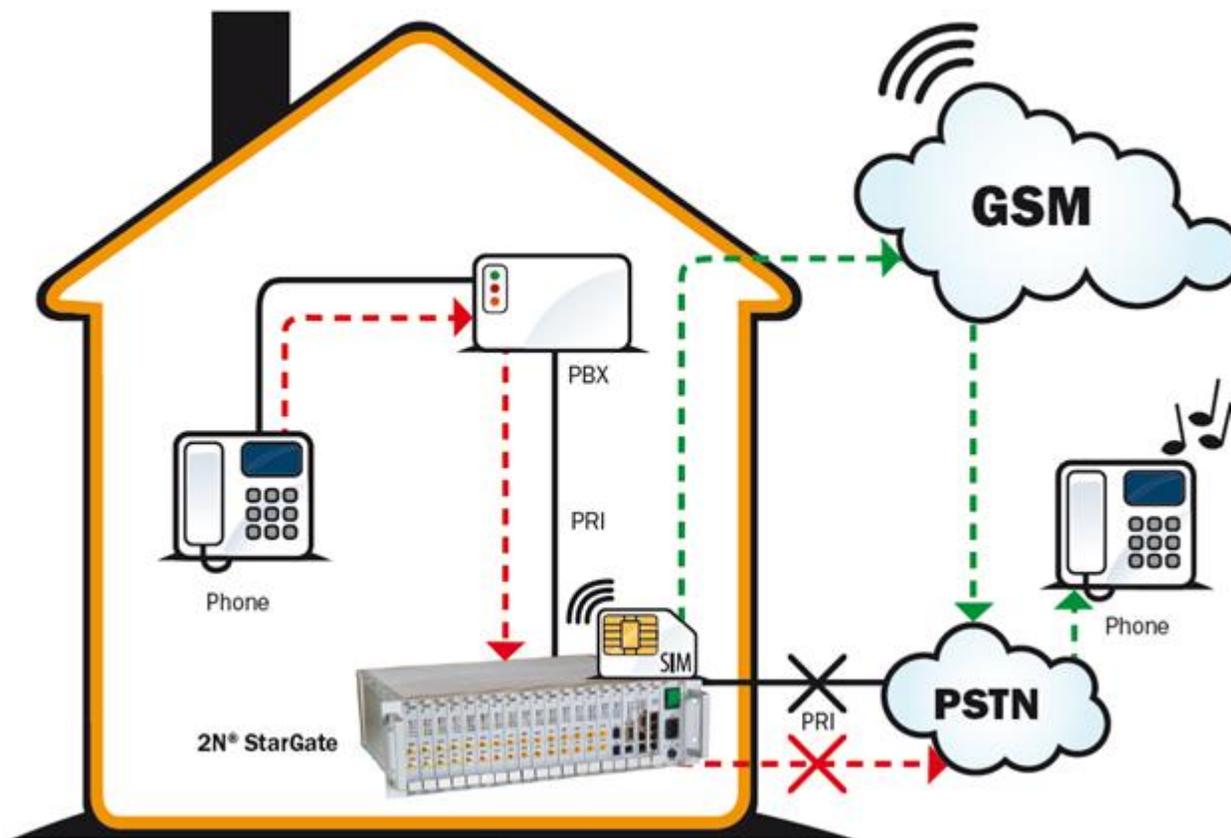

- SMS at no answer
- SMS sending/receiving
- Modularity
- Remote control
- Auto CLIP Routing
- Antenna splitter

2N[®] StarGate

PRI Back-up:

If your company has a PRI connection to a PSTN network, 2N[®] StarGate will automatically route all calls via a GSM network in the event of PRI line failure.

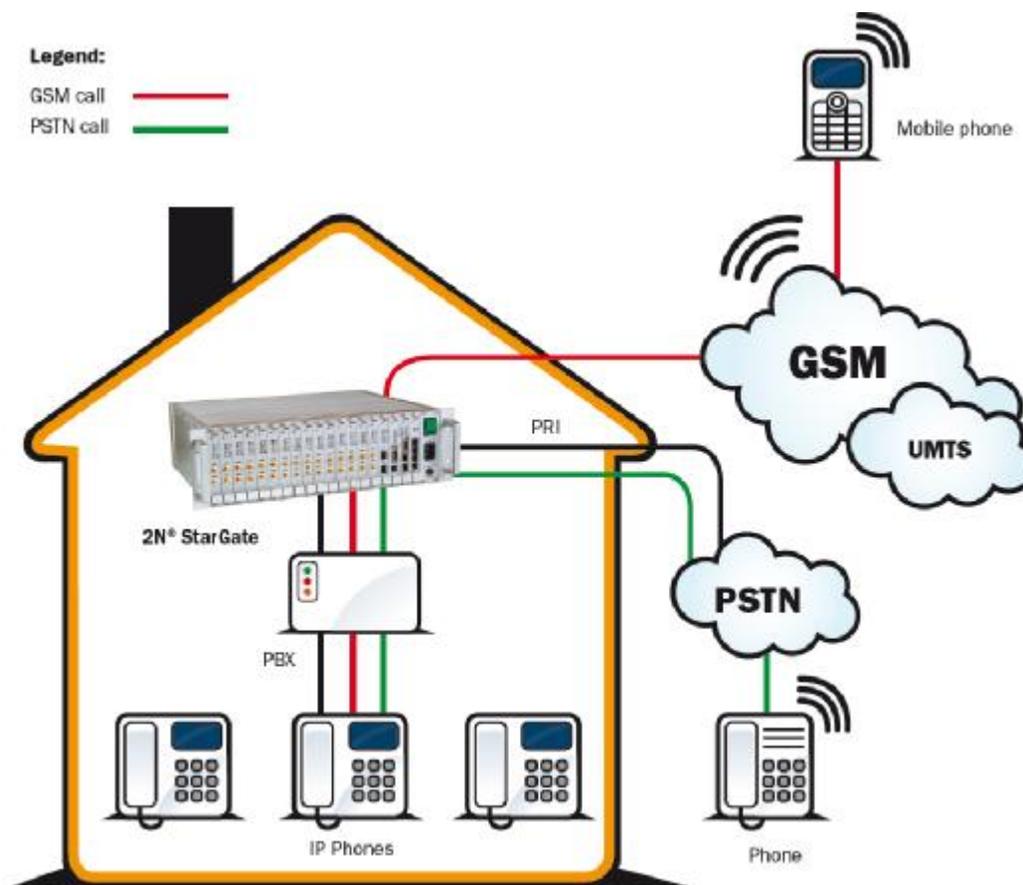

2N[®] StarGate

Cost saving:

2N[®] StarGate is designed to maximise cost savings on GSM/UMTS calls. In DialThru mode it connects between a PSTN network and PBX. It automatically identifies whether the call is to GSM or PSTN and selects the cheapest route.

Why 2N?

Customized solutions

The background of the slide features a blue silhouette of a world map. A large, light gray Euro symbol (€) is positioned on the left side, overlapping the map. Three large, light gray arrows point from the right towards the center of the map, each pointing to one of the three benefit text boxes.

Proven international track record
